

eMAM LIVE

eMAM Live supports live capture, logging, edit and delivery of media for corporate and sporting events.

- On-Premise, Cloud or Hybrid environments
- Event and sports logging live
- Multichannel Live eMAM & Adobe Premiere Pro remote editing
- Deliver finished production and highlights to social media and VOD platforms

Scheduled Capture:

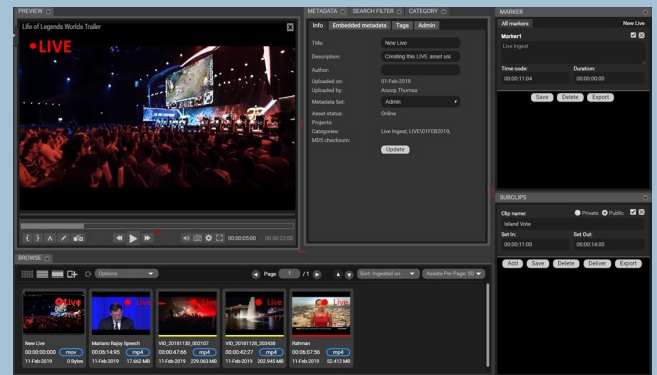

Real time captures from network IP video sources including TS, MP4, and MXF. Drastic Technologies Net-X-Convert transcodes the growing stream into an RTIN real time format during recording. Within eMAM, users can use the embedded Drastic Net-X-Player to preview, log and edit live streams.

- Live Preview of growing video stream
- Rough cut editing in eMAM Director
- Quickly generate highlights and delivery media
- Craft editing with Adobe Premiere Pro

Supported Media Encoders:

eMAM Live supports many of the market leading media encoders including AJA, BlueFish444, BlackMagic and Telestream's LightSpeed server.

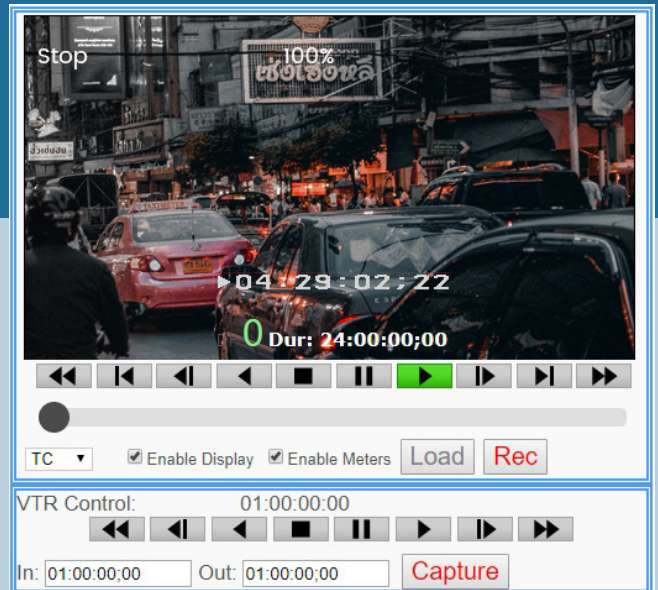

- Web-based Schedule and timecode-based capture
- Live crash record as needed
- Web Streaming and Broadcast quality recording

eMAM Live workflows integrate with market leading encoders including AJA, BlueFish444, BlackMagic and Telestream's Lightspeed server. The bundled web-based interface manages live and tape-based captures. Live events can be a scheduled captured or as needed.

Live Event and Sports Logging

Live logging of corporate and sporting events can be tagged using Dixon Sports. An event and sport-specific logging system, Dixon Sports provides point and click logging of media with seamless transfer of timecode-based metadata to the eMAM system.

eMAM Live Partners:

Drastic Technologies Ltd, provides Net-X-Code, Convert and Player live preview and edit capabilities.

Dixon's sports loggers make in-depth logging easy and fast and provides live logging of events with seamless transfer on TC-based metadata to the eMAM platform.

Bridge Digital provides hardware and network design for the eMAM solution with over 100+ year of experience.

eMAM is widely used workflow solution for media, corporate, educational, and governmental customers worldwide. With over 60 technology partners, eMAM provides complete integrated workflows on premise, in the cloud, or as hybrid.
